DETAILED ACTION

1. Claims 7-27 were cancelled by applicant in the amendment received January 17, 2006.

Election/Restrictions

2. Applicant's election without traverse of the restriction in the reply filed on January 17, 2006 is acknowledged.

Drawings

3. Figures 34-36 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

4. Claims 1-6 are allowed. The following is an examiner's statement of reasons for allowance. Independent claim 1 is allowed because the prior art of record fails to teach or fairly suggest an apparatus, or means for, a wavelength selector switch comprising: a first refracting plate that refracts the second wavelength-multiplexed light beam refracted, respectively; a

polarization controller that selectively changes a polarization angel of each of the parallel light beams between the first and second polarization angles, and passes the parallel light beams; a second refracting plate that refracts wavelength components, of the third wavelength-multiplexed light beams, having the second polarization angle at a refraction angle to direct the wavelength components having the second polarization angle to the second optical output port and to direct wavelength components, or the third wavelength-multiplexed light beams, having the first polarization angle to the first output port; in combination with the other recited limitations in the claim. Claims 2-6 are allowed by virtue of their dependence on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cohen et al. (2005/0036202) teaches a wavelength selective optical switch. Patel et al. (5,414,540) teaches a frequency-selective optical switch. Wu et al. (2003/0091261) teaches a polarization beam separator and combiner. There are several other related inventions listed on the attached PTO-892 form.
